#### Sac City, Iowa Population Pyramid, a 20201

<sup>a</sup>Each bar represents the percentage that an age-sex group comprises of the total population.

The median household income in Sac City is less than the median household income of Sac County. The median value of owner-occupied housing units is lower in Sac City than for Sac County. There is a lower percentage of vacant housing units in Sac City than there is for Sac County. Many housing units in Sac City were built between 1960 to 1979. There is a higher percentage of individuals 25 and older with a Bachelor's degree or higher in Sac City compared to Sac County.

Median Household and Per Capita Income, 2018-2022<sup>2</sup>

		City	Co	ounty
	Estimate	MOE*	Estimate	MOE*
Total Households	910	+/- 91	4,210	+/- 125
Less than \$34,999	33.8%	+/- 4.0%	24.2%	+/- 2.5%
\$35,000 To \$49,999	7.9%	+/- 4.0%	11.2%	+/- 1.8%
\$50,000 To \$99,999	30.9%	+/- 3.2%	34.2%	+/- 2.1%
\$100,000 Or More	27.4%	+/- 3.2%	30.3%	+/- 2.4%
Median <sup>4</sup> Household Income	\$54,815	+/- \$9,778	\$68,778	+/- \$4,041
Median Family Income	\$92,857	+/- \$18,565	\$87,162	+/- \$6,152
Per Capita Income	\$40,725	+/- \$5,170	\$38,596	+/- \$2,092

#### **Educational Attainment, 2018-2022<sup>2</sup>**

	(	City	County		
	Estimate	MOE*	Estimate	MOE*	
Population 25 and older	1,375	+/-122	6,902	+/-41	
High School Graduate or Higher	91.7%	+/-3.5%	93.7%	+/-1.4%	
Bachelor's Degree or Higher	24.5%	+/-5.4%	21.6%	+/-2.3%	

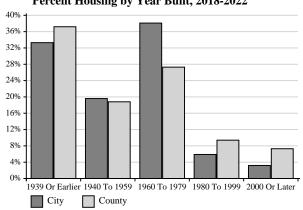

<sup>\*</sup>MOE = the margin of error for American Community Survey estimates<sup>2</sup> which is a numerical value that when added to or subtracted from the point estimate value gives the range of a 90% confidence interval around the estimate.

#### Housing Characteristics, 2018-2022<sup>2</sup>

	J	•		
		City	Co	ounty

Female HH <sup>b</sup>	**%	+/-**%	**%	+/-**%
with children	**%	+/-**%	**%	+/-**%

<sup>&</sup>lt;sup>a</sup> for whom poverty status is determined, <sup>b</sup> female householder, no husband present, \*\*MOE is high, use county estimate.

#### **Notes and Source Information:**

- <sup>1</sup>U.S. Census Bureau; Decennial Censuses 1940 2020
- <sup>2</sup>U.S. Census Bureau; American Community Survey 2018-2022
- <sup>3</sup> For the 2020 Decennial Census, households are divided into subcategories by two different methods. One method (family or nonfamily) is based on the presence or absence of family relationships among the household members and the householder. Using family relationships (birth, marriage, or adoption) has been the usual way to classify households, and the data using this method has good comparability between 2010 and 2020. In 2020, the Census Bureau introduced an additional method to divide households into subcategories. This second method (couple or noncouple) is based on the presence or absence of a couple relationship for the householder. The relationship can be as a married spouse or as an unmarried partner and can be of the opposite or same sex. The 2020 data reported for the second method (except for married couples) does not have good comparability with data from 2010. For smaller towns, the couple or noncouple data are omitted in this profile.
- <sup>4</sup>Median is the middle value of a distribution.
- <sup>5</sup>The age dependency ratio compares, by age, those typically not in the labor force with those who typically are in the labor force. Old Age dependency is persons 65+ per 100 persons age 18-64. Child dependency is persons under age 18 per 100 persons age 18-64. The total age dependency ratio is persons under age 18 plus persons 65 or older per 100 persons age 18-64.
